Factory Data was founded in 1998. We have wide experience in the development of electronic catalogues and gathering and processing information from a wide range of sources.

We are specialized in the auto parts sector giving service to distributors, wholesalers, rebuilders and manufacturers.

Our aim is to supply our clients with the best information possible to facilitate the running of their companies and providing strategic information to enable them to reach their goals in this ultra-competitive and fast growing industry.

We offer a series of computerized tools together with a series of specialized and customized services to cover all your needs.

Nowadays, we provide these services to a large number of countries around the world, consolidating our company's global vision.

Our efforts are aimed at offering an integrated service that exceeds the expectations and most demanding requirements of all our customers.

What can we do for your business:

A. PRODUCTS

- Elecsys is an electronic catalogue for starter motors, alternators, DC motors and their components, especially designed for distributors, wholesalers, rebuilders and manufacturers.

This catalogue is a key tool for many users worldwide, enhancing their customer service as well as acquiring better knowledge about electrical information.

B. CONSULTANCY SERVICES

- Improve your company's decision-making process: proposals for optimizing stock, studies of brand coverage, competitors & market studies, etc.
- Assistance with publishing state-of-the-art technical documentation: cross-references between different manufacturers, technical data, etc.

C. SALES AND PURCHASING

We are reps for many factories, importers and distributors so we are able to offer and link you to many suppliers that will bring you solutions at the best quality and price.

We are also interested in representing your company in order to introduce your range of products into the best worldwide customer network.
