

# SERVICE FOR CHECKING AVAILABILITY OF MATERIAL

## SIMPLE, DIRECT AND ADVANTAGEOUS

JOIN OUR NETWORK OF INFORMATION PROVIDERS FOR THE ELECSYS PROGRAM AND MAKE USE OF THE LARGE NUMBER OF ELECTRIC SPECIALISTS WHO USE THE SYSTEM

Nowadays, electric automotive world is in constant evolution.

- The rules of the market are changing as are our clients' priorities:

- 1) Availability
- 2) Delivery time
- 3) Price
- 4) Quality (brand)

The volume of new references from the machine and parts manufacturers include in their catalogues and the high costs of many of these makes it virtually impracticably to have a full range of products available to cover all your clients' everyday needs. On the other hand, there are numerous references that are difficult to find either because of their low demand or a high degree of specialization.

- When a client requests us for a part and we don't have it in stock, we can face 4 different scenarios:

- 1) The client waits for us to find the piece.
- 2) The client goes to our competitors. *We lose the client.*
- 3) The client goes to the official dealer. *We lose the client.*
- 4) The client does not return. *We lose the client.*

Contact us if you require more information about this new service.

At Factory Data, we have created a new service where the users of the Elecsys program can check the availability of any reference in various warehouses.

Our aim is to complement your normal suppliers through a network of "information suppliers" who offer you alternatives to your product.

The system will help you to improve the quality of the service in your everyday business, solving problems and finding solutions for your clients.

# SERVICE FOR CHECKING AVAILABILITY OF MATERIAL

## THE NEW CONSULTING SERVICE

Make use of this new service for checking the availability of stock and join our network of information suppliers.

### On-line information suppliers

This type of information supplier will offer real-time connections to their stores to check the availability of a specific reference.

### Off-line information suppliers

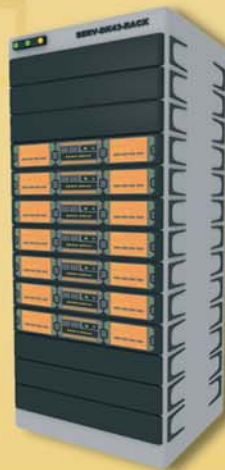

For those distributors who have obsolete, low turnover or very specialized products so they can transfer a list of material to our database. This list of products will be transferred and updated on our server periodically (between 3-6 months).

## VIEWING AVAILABILITY OF STOCKS IN ELECSYS

Once the user finds the machine or part through the different screens of the Elecsys programme, we search for the equivalents  and then use the option of consulting the availability  or press [Shift+F3].

On the availability information screen, you will see the different information suppliers. There are different types of supplier.

-  On-line: The information shown on the screen is in real time.
-  Off-line: information is updated by the electrical distributor periodically.

## CLIENT AUTHORIZATION

The on-line stock information supplier will have the possibility of giving an access code to those clients you wish to allow to activate your service.

On the other hand, the Off-line stock information will be available for all clients.

In both cases, the information suppliers will receive regular statistical reports about the use of the service by Elecsys users.

## BENEFITS FOR YOUR COMPANY

**Widen your market of clients**, having access to the main electrical distributors in the sector.  
**Reduce the response time for your clients thus improving the efficiency of your service.**
